

Titan V1 Table

Titan V1 (Standard / Premium Version) Flatbed Applicator

- The flatbed applicator Titan V1 series is fully equipped multipurpose machine that give you access to the superior production method provided.
- Its unique tilted table can reduce transportation cost and easier to entrance. Fast assembling and easy operation. A media roll holder at end of table provides easy media loading.

Performance

- It is more easier to entrance, saving transportation cost and space.
- Illuminated table is ideal to apply multicolored or translucent graphics.
- Side trays give access to storage your medias and tools. A media roll holder at end of table for fixing any size prints or roll films, which could improve your working efficiency.
- Heated 60°C roller will benefit the pressure sensitive glue to have better finish during application.
